Palangka Raya, Indonesia

I am a software engineer experienced in Android app development and web development. I have extensive understanding and experience in programming languages such as Kotlin, Javascript, and PHP. I also have expertise in using frameworks such as Android SDK, Codeigniter, and Laravel. I have the ability to solve problems and create high-quality applications using Agile and Scrum development methodologies. I am open to new technologies and always strive to improve my skills in the world of application development and help companies to achieve their goals.

Work Experiences
